Getting to know your Echo

1. Download the Amazon Alexa app

   Download and install the latest version of the Alexa app from the app store.

2. Plug in your Echo

   Plug your Echo into an electrical outlet using the included power adapter. A blue light indicates power is turned on. It takes 1 minute for Alexa to boot up.

3. Set up your Echo in the Alexa app

   Open the Alexa app and follow the on-screen instructions to set up your device. If you aren’t prompted to set up your device after opening the Alexa app, just tap the device icon in the bottom right of the screen to get started.

   The app helps you get the most out of your Echo, where you set up calling and messaging, and manage music, pets, shopping, and news. You can also get the latest news and information from Alexa on your smartphone.

   You can also set up the devices in your Alexa app to control your smart home devices.

   Get started today!

Things to try with your Echo

- Ask Alexa to show you the latest news
- Ask Alexa to play radio
- Ask Alexa to call your family
- Get answers to your questions
- Control your smart home

Design to protect your privacy

Amazon designs Alexa and Echo devices with multiple layers of privacy protection. From microphone controls to the ability to view and delete your voice recordings, we have transparency and controls over your Alexa experience. Give us your feedback

Alexa is always learning and adding new skills. We want to hear about your experiences with Alexa! Visit the Alexa app and visit http://www.amazon.com/alexa/feedback

Getting started with your Echo

Where to put your Echo

Echo works best when placed in a central location, at least 20 cm from any walls. Place it on a shelf or table near your kitchen counter, the front of your desk, or on a bedside table.
