1. Plug in your Echo Show 8

Plug the 6-foot power cord into the power port on the back of your Echo Show 8. The display will illuminate and there will be a chime.

2. Set up your Echo Show 8

Follow the instructions to set up your Echo Show 8. During setup, you will connect your Echo Show 8 to the internet so you can access the voice controls. Please make sure you have your Wi-Fi setup.

3. Getting started with your Echo Show 8

To power on your Echo Show 8, tap on the power button or press the power button on the remote.

4. Change your settings

You can change settings in the Alexa app. Tap on the settings icon (gear) on the home screen.

5. Things to try with your Echo Show 8

Watch TV shows, movies, video clips and podcasts.

Using the Alexa app

The Alexa app helps you get the most out of your Echo Show 8. It's where you can explore Alexa skills and manage your account, including your Alexa-enabled devices. To download and install the Alexa app on your mobile device, go to the app store that corresponds to your device platform.

Designed to protect your privacy

Amazon uses design and development techniques to ensure a high level of privacy protection. The microphones and camera are on when the device is asleep and only enable when it detects your voice or the wake word. The device may also send limited amounts of data to Amazon to help improve the accuracy of your commands. For more information, please see the Alexa privacy page.

Give us your feedback

We're always improving Alexa's voice and vision features and want to get your feedback. To provide feedback, please visit the Alexa app.
