1. Position your Fire TV Cube
   - Place Fire TV Cube 30–40 cm away from any speakers, including your TV speakers, with the gap facing where you usually sit.
   - This device acts like a remote control. It needs to hear you and should be unobstructed, not in a closed cabinet.
   - (Optional) To control entertainment components that are inside a closed cabinet, use the included IR extender cable.

2. Connect your Fire TV Cube
   1. Connect one end of the HDMI cable (not included) into the HDMI port on your TV. Connect the other end into the HDMI port on your TV. Depending on which HDMI port is on your TV or device, you’ll need that information later during setup.
   2. (Optional) To use an Ethernet cable (not included), connect the Amazon Ethernet Adapter as shown.
   3. Plug the included power cable into Fire TV Cube and then into an electrical outlet.

3. Power-up your Alexa Voice Remote
   1. Open the back of the remote and insert the included batteries.
   2. After placing your Alexa Voice Remote, follow the on-screen instructions to control the power and volume of your TV.
      - If your remote is not discovered, press and hold the Home button until the LED starts to rapidly flash amber.
